Rural Behavioral Health Workforce Development

Dennis Mohatt, Director

Mimi McFaul, Associate Director

WICHE Mental Health Program
WICHE Region

- Alaska
- Arizona
- California
- Colorado
- Hawaii
- Idaho
- Montana
- Nevada
- New Mexico
- North Dakota
- Oregon
- South Dakota
- Utah
- Washington
- Wyoming
Defining Behavioral Health Workforce

- Mental health & Substance abuse

- Wide range of
  - Disciplines (psychiatry, psychology, social work, nursing)
  - Providers (psychologists, counselors, psychiatric nurses)
  - Professional levels (paraprofessional to graduate level)
  - Services (treatment, prevention)
Behavioral Health Workforce Trends

- Changing Demographics
- Aging Population
- Technological Innovations
- Demand Driven System (Cost, Consumer Satisfaction, Quality)
- Increase in Medicaid as funding source
What We Know For Sure

- Rural Professionals Shortage Rates Unchanged for Past 5 Decades
- Rural BH Systems Average 30% Staff Vacancy
- Average Time to Recruit Psychiatrist to Rural Practice is 32 months; increases w/solo practice
- Providers w/Rural Training & Practica More Likely to be Retained in Rural Practice
- Children De-Select Careers by 4th Grade!!!
- Inadequate Supervision a Major Retention Factor…Employees Leave Supervisors not jobs
Findings from Annapolis Coalition Report

- Workforce Crisis with Specialty Pops (e.g., children, geriatrics, substance abuse, persons of color)
- Dissatisfaction among Persons in Recovery and Families
- Employer Dissatisfaction with the Pre-Service Education of Professionals
- Delay: Science to Service
- Multiple Silos & Absence of Coordination
- Narrow Focus on Urban, White Adults
- Need better Data & Tools
- Propensity to do what is Affordable, Not What is Effective
- Pockets of Workforce Innovation: Difficult to Sustain or Disseminate

Source: Annapolis Coalition National Strategic Plan for Behavioral Health Workforce Development
Other Contextual Influences

- Low wages and benefits
- Stigma around mental health
- High Turnover
- Toxic Work Environments
Behavioral health trends, issues, and influences are magnified in RURAL communities!
The Cold, Hard Facts

- > 60% of rural Americans live in mental health professional shortage areas
- > 90% of all psychologists and psychiatrists, and 80% of MSWs, work in metropolitan areas
- > 65% of rural Americans get their mental health care from their primary care provider
- Rural Americans enter care later in the course of their disorders, with more advanced symptoms, resulting in more intensive & expensive interventions
Mental Health Professional Shortage Areas

Health Professional Shortage Areas - HPSA (mental)

Note: Alaska and Hawaii are not to scale.
Health Professional Shortage Areas: Primary Care

HPSA designation can be given for a population group, single county, or a geographical area. As a result, a single county can have all three.
Challenges to Recruit and Retain Rural Placements

- Urban-trained individuals are reticent to move to a rural places
- Lower than standard wages and salaries
- Life in the “Fish Bowl”
- Lack of rural specific training opportunities
- Limited access to supervision & mentorship opportunities, & peer support
Strategies for Responding to the Challenges
We will discuss 3 categories of STRATEGIES

• Create New Rural Educational Delivery Methods and Models
• Grow Your Own
• Partnering, Natural Community Supports, & Leadership
Create New Rural Educational Delivery Methods and Models

- Develop health career pathways & ladders
- Use technology to improve access to training & career support
- Create applied educational & training programs
- Address strategies to reduce student debt load through rural service
Grow Your Own

- Increase mental health literacy
- Increase career information & recruitment efforts in middle schools, high schools
- Marketing behavioral and other health job opportunities to broader market
- Recruit people living in rural areas
- Develop a career ladder; articulated pathways
- Incentives ($, returning to the community)
Partnering, Natural Community Supports, & Leadership

- Facilitate partnerships between higher education, public mental health system, and local community
- Use natural helpers and peer supports
- Create leadership opportunities
Rural Behavioral Health Workforce
Grow Your Own Strategy Logic Model

- Population of Focus

1. Increase knowledge of behavioral health
2. Exchange knowledge about behavioral health careers
3. Provide accessible behavioral health training
4. Applied rural training opportunities
5. Job
WICHE Rural MH Workforce Projects
Rural Workforce Innovations

Alaska – Multi-Year engagement to support statewide strategic planning. Currently supporting coordination of action plan activities. New contract to support formulation.

California – Just starting a planning process to create a sustainable distance learning effort.
Rural Workforce Innovations

Hawaii - Initial stages of study and planning effort.

Nevada – Completed initial study and planning meeting. Moving to action planning and implementation of new strategies.

New Mexico – Initial stages of study and planning effort.

North Dakota – Just completed workforce study and planning meeting.
