Historically Black Colleges and Universities by State

HBCUs are a source of accomplishment and great pride for the African American community as well as the entire nation. The Higher Education Act of 1965, as amended, defines an HBCU as "...any historically black college or university that was established prior to 1964, whose principal mission was, and is, the education of Black Americans, and that is accredited by a nationally recognized accrediting agency or association determined by the Secretary of Education to be a reliable authority as to the quality of training offered or is, according to such an agency or association, making reasonable progress toward accreditation.”

NCAN Member Activities

Perhaps in West Virginia, Ohio, or Pennsylvania, students are learning about the benefits of a college education. The members of the National College Access Network (NCAN) are working to make college access a reality for all students.

The CollegeNews, ECNC, and NCAN are working together to support college access. The CollegeNews is an online platform that provides news and information about higher education. ECNC is a national organization that supports college access for low-income students. NCAN is a network of organizations that work together to promote college access for all students.

As a result of the Detroit Reduction Act of 2018, which provides financial aid to low-income students, the number of students attending college has increased. This is good news for the future of higher education.
